this corner → scanner's arrow corner

✂ Cut out along the dashed line.

The card goes here, face down, edges roughly on the little ticks.

SHEET 1 · FRAME · GREY

# Grade Check scan guide

**Grey version, for black-bordered cards.**

Reusable. Puts every card in the same spot, on grey.

1. Cut out the window on the dashed line.
2. Lay this sheet on the glass, **this side up**, blue corner in the scanner's arrow corner. Leave it there.
3. Drop the card into the window, **face down**.
4. Lay **sheet 2** on top, **grey side down**.
5. Close the lid gently. First time: press **Find my card** in Grade Check.

Back of the card: flip it inside the window. 180° scans: turn it upside down in place. Sheet 2 just lifts off and goes back on.

## Why grey?

Black-bordered cards disappear against black. Mid-grey sits between a black border and white edge wear, so both stand out. Use this guide for black-bordered cards and the black guide for everything else. Keep the grey sides clean: dust or scuffs can look like defects.

Scale check: this ruler should measure exactly 3 inches.

Back of sheet 1. This grey block surrounds the window on the glass side, so the scanner sees grey right up to the card.
